

# Tell Congress to **#FundAlzheimers**

**5** million Americans are living with Alzheimer's disease or another dementia.

**15** million Americans are caring for someone with this disease.

Some in Congress tried to help these families, proposing a transformative boost for Alzheimer's disease and other dementia funding in 2016.

Yet Congress failed to pass a 2017 budget, holding back hundreds of millions of dollars in new research, care, and support funding that could help us all as we age.

 **YOU CAN HELP.**

Call your members of Congress at 202-224-3121 and say:  
"Pass the 2017 federal budget this April with all the planned funding for Alzheimer's research, care and support."
